(54) Title: METHOD FOR DISCRIMINATION OF METAPLASIAS FROM NEOPLASTIC OR PRENEOPLASTIC LESIONS

(57) Abstract: The present invention relates to a method for discrimination of p16<sup>INK4a</sup> overexpressing metaplasias from neoplastic or preneoplastic p16<sup>INK4a</sup> overexpressing lesions by determination of the level of high risk HPV encoded gene-products such as e.g. HPV E2 and/or HPV E7 molecules in biological samples in the course of cytological testing procedures. The method thus enables for reduction of false positive results in the p16<sup>INK4a</sup> based detection of anogenital lesions in cytological testing procedures.

WO 2004/005927 A1

## INTERNATIONAL SEARCH REPORT

International Application No

PCT/EP 03/50096

A. CLASSIFICATION OF SUBJECT MATTER  
IPC 7 G01N33/574 C12Q1/68

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)  
IPC 7 G01N C07K C12Q

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ, BIOSIS, MEDLINE, EMBASE

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

| Category * | Citation of document, with indication, where appropriate, of the relevant passages   | Relevant to claim No. |
|------------|--|-----------------------|
| X          | MILDE-LANGOSCH KARIN ET AL: "Expression of cyclin-dependent kinase inhibitors p16MTS1, p21WAF1, and p27KIP1 in HPV-positive and HPV-negative cervical adenocarcinomas."<br>VIRCHOWS ARCHIV,<br>vol. 439, no. 1, July 2001 (2001-07),<br>pages 55-61, XP001150380<br>ISSN: 0945-6317<br>the whole document<br>-----<br>-/-- | 1-3,6-26              |

☒ Further documents are listed in the continuation of box C.☒ Patent family members are listed in annex.

## \* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the International filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the International filing date but later than the priority date claimed

"T" later document published after the International filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&amp;" document member of the same patent family

Date of the actual completion of the International search

# INTERNATIONAL SEARCH REPORT

International application No.  
PCT/EP 03/50096

## Box I Observations where certain claims were found unsearchable (Continuation of Item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claims Nos.:  
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

## Box II Observations where unity of invention is lacking (Continuation of Item 2 of first sheet)

This International Searching Authority found multiple inventions in this International application, as follows:

see additional sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☒ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:  
1, 2 and 6-26 (all partially); 3 (complete)

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.  
☐ No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1, 2 and 6-26 (all partially); 3 (complete)

Method for discrimination of metaplasias from neoplastic or preneoplastic lesions based on assessing simultaneous presence of cells overexpressing p16-INK4a and cells expressing HPV E7 gene. Kit comprising probes for performing said methods.

---

2. claims: 1, 2, 4 and 6-26 (all partially)

Method for discrimination of metaplasias from neoplastic or preneoplastic lesions based on assessing simultaneous presence of cells overexpressing p16-INK4a and cells expressing HPV E2 gene. Kit comprising probes for performing said methods.

---

3. claims: 1, 2, 4 and 6-26 (all partially)

Method for discrimination of metaplasias from neoplastic or preneoplastic lesions based on assessing simultaneous presence of cells overexpressing p16-INK4a and cells expressing HPV E6 gene. Kit comprising probes for performing said methods.

---

4. claims: 1, 2, 5 and 6-26 (all partially)

Method for discrimination of metaplasias from neoplastic or preneoplastic lesions based on assessing simultaneous presence of cells overexpressing p16-INK4a and cells expressing HPV L1 gene. Kit comprising probes for performing said methods.

---

5. claims: 1, 2, 5 and 6-26 (all partially)

Method for discrimination of metaplasias from neoplastic or preneoplastic lesions based on assessing simultaneous presence of cells overexpressing p16-INK4a and cells expressing HPV L2 gene. Kit comprising probes for performing said methods.

---
